METTA 01 600x1800

Metalart is a fluid expression of place that accommodates different types of style. It integrates every design element, allowing styles, even those that are very diverse, to exist simultaneously. The collection interprets spaces by giving exponential value to furniture components, becoming an element that enriches the space.

The collection is the result of a photographic investigation with a two-movement approach: immersion in a flow and a freeze frame. The result is a selection of up to 110 different graphics for the standard formats, for a fluid and changeable effect. Unparalleled dynamism.

A unique feature of this collection is the dripping, whose visual and tactile effect is dynamic and fluid. Its combination with the oxidation of metal makes Metalart look "alive", giving rooms a changing perception.

The delicate effect combining gloss and satin created by the enamel enhances the perceived dynamism and movement of the graphics. The directionality creates an effect of continuity between the vertical and horizontal planes, almost merging them together. Metalart impresses with its personality and the atmosphere it is able to create.
